The **DIVVEE 60** is a high capacity loadshare device that allows you to split the load between EV-Chargers, Hot-Tubs, Shop Tools, Heating & AC, and other devices at up to 60 amps with no delay.

DIVVEE works using your home's existing electrical infrastructure diverting the energy to where you need it, when you need it, saving you thousands on expensive panel upgrades, while still giving you the power needed for all your home energy needs.

LEVEL 2 EV CHARGING 

NO PANEL UPGRADE 

60 AMP CURRENT 

ANY DEVICE UP TO 240V
